

The Aster Hotel — Loom Demo Guide

AI Hotel Reservation & Concierge Voice Agent Capstone

Use this document as the recording checklist and submission guide.

1. Loom Recording Order

1	Open xAI Playground	Show The Aster Hotel Reservations & Concierge Agent and Live status.
2	System Instructions	Show persona, booking flow, FAQ, housekeeping/concierge rules, confirmation rule, and concise phone-call
3	Voice & Greeting	Show the welcome message and selected voice. Mention turn detection configuration if visible.
4	Tools	Show the five required tools: check_room_availability, book_room, request_housekeeping, schedule_concierge
5	n8n Mock Backend	Show the five webhook workflows and their Return nodes.
6	Mock Responses	Show the hardcoded JSON responses required by the assessment.
7	Six Test Flows	Run or demonstrate the booking, unavailable-room alternative, FAQ, housekeeping, concierge, and out-of-s
8	Finish	State any limitation, especially if actual voice execution could not be completed because of xAI credits.

2. Six Demo Flows

Flow 1 — Booking	"A king room for July 28–30."	Availability → booking → \$189/night → HTL-2291 → confirmation sent
Flow 2 — Unavailable Room	Request a room type configured to return an alternative	Offer Standard Queen — \$149/night instead of failing.
Flow 3 — FAQ	"Is breakfast included?"	Answer from embedded FAQ: complimentary breakfast, 7–10 AM; no
Flow 4 — Housekeeping	"Room 412, can I get extra towels?"	Call housekeeping → logged → ETA 20 minutes.
Flow 5 — Concierge	"Can you book me a dinner reservation for 2 at 7 PM?"	Schedule concierge → service ID CNC-8817.
Flow 6 — Out of Scope	"Do you allow pets?"	Do not invent an answer; say the detail is unavailable and offer the fr

3. Required Mock JSON

check_room_availability: {"available": true, "room_type": "Deluxe King", "rate_per_night": 189, "alt_options": ["Standard Queen - \$149/night"]}

book_room: {"status": "confirmed", "confirmation_code": "HTL-2291"}

request_housekeeping: {"status": "logged", "eta_minutes": 20}

schedule_concierge_service: {"status": "scheduled", "service_id": "CNC-8817"}

send_confirmation: {"status": "sent", "channel": "sms"}

4. Final Submission Checklist

- Loom/YouTube demo link included
- xAI Playground agent configuration shown
- System prompt shown
- Five function tools shown
- FAQ knowledge base shown
- Mock backend payloads shown
- Voice / turn-detection settings shown

- Six required flows demonstrated or clearly simulated
- Challenges, resolutions, assumptions, limitations, and extra features mentioned in LMS Description

5. Important Honesty Note

Only claim a flow as successfully tested if it was actually executed. If xAI voice execution remains blocked by insufficient credits, show the configured agent and backend in Loom and state that the live voice test could not be completed because of the credit limitation. The assessment requires a live or simulated call demonstration and configuration evidence.
